

No. 2816

Obsolescence of the DTU-100 and Portable DTU-100

Application:

This Service Letter applies to the DTU-100, P/N 1406-01-X and Portable DTU-100 P/N 1407-01-1.

Description:

Universal Avionics was recently notified that iomega[®] has ceased manufacturing the Zip[®] disk drive units used in our DTU-100 products, forcing the end of production of this product line.

Universal Avionics has recently received certification of the Solid State Data Transfer Unit (SSDTU) P/N 1408-00-X and Portable SSDTU P/N 1409-00-2 as a replacement for the DTU-100. The SSDTU is capable of supporting all of Universal's products previously supported by the DTU-100.

Universal will continue to provide databases available on Zip[®] disks to customers that desire to continue using the DTU-100 and will also continue to provide warranty service for the DTU-100. Out-of-warranty repairs requiring the replacement of the ZIP drive will no longer be supported and Non-warranty exchanges are no longer available.

Temporary Changes, dated 19 September 2008, have been issued against all of the Installation, Operator's and Users manuals relative to the SSDTU. Please refer to Service Bulletin No. 3303 for detailed information about the SSDTU and Portable SSDTU.
