Navdata Availability for the UNS-1M and UNS-1Msp NMS

Effectivity

This Service Letter applies to Universal Avionics System Corporation (UASC) UNS-1M, P/N 1013-XX-XXX, and UNS-1Msp, P/N 1114-XX-XXX Navigation Management System (NMS) Units. These systems use P/N 1348-() series navigation databases.

Description

Effective June 2, 2011, Universal Avionics will end support for NEW navigation database subscriptions applicable to UNS-1M and UNS-1Msp NMS units. This includes and is limited to P/N 1348-() series navigation databases.

This announcement is prompted by difficulty in obtaining a reliable source for the PCMCIA Flash Memory cards used to provide navigation databases for the UNS-1M and UNS-1Msp NMS units.

Please note that current subscriptions will not be affected by this change; this action only applies to requests for a NEW navigation database subscription. New subscriptions include:

- Addition of a UNS-1M or UNS-1Msp equipped aircraft into an existing account
- Installation of a UNS-1M or UNS-1Msp into an aircraft with an existing navigation database subscription
- Transfer of a UNS-1M or UNS-1Msp equipped aircraft from another account

Material, Cost, and Availability
