

No. 2835

Announcement of the Availability of TAWS Obstacle Database Updates

Application:

This Service Letter applies to TAWS, P/N 3010-0X-00.

Description:

Obstacle Database updates are available for installation into Universal Avionics' TAWS Class A and B systems using SCN 12.0 and later. This database contains the latest obstacle features to increase the effectiveness of your TAWS installation.

The Obstacle Database is updated quarterly. Database updates are field loadable by customers using a Universal Avionics FMS or through a personal computer with Universal Avionics' Terminal Monitor Program (P/N A12015) and a DTU-100 Zip disk drive or Solid State Data Transfer Unit (SSDTU).

NOTICE

The Obstacle Database is intended for situational awareness and reference use only. It is not intended for actual aircraft navigation and does not include all obstacles in the world. The Obstacle Data contained in the Obstacle Database is compiled by Jeppesen Sanderson, Inc. and is based on information obtained from government and other publicly available sources for use in Universal Avionics' TAWS systems. The TAWS systems with the Obstacle Database is not intended to provide navigational guidance, except for warnings to avoid hazardous terrain and/or obstacles, nor to relieve aircrews from following published navigation procedures, routes, altitude restrictions, and/or instructions from appropriate air traffic control agencies.

Obstacle Database updates are available on Zip disk or USB memory stick. Contact our Navdata Services Department at (520) 295-2300 or (800) 321-5253, or email navdata@uasc.com to set up a subscription or one-time purchase.

Obstacle Database Loading Instructions:

To load or update TAWS Obstacle Database refer to *TAWS SCN 12.X Operator's Manual*, Report Number 34-40-01.06.
